

GATEKEEPER PASSWORD VAULT

Single source for all your passwords and usernames.

An enterprise password managers that provides faster access for all users on your network.

ENTERPRISE PASSWORD MANAGER

No more phishing attacks from scam emails and websites. GateKeeper Enterprise access control system provides a secure password vault. All your web credentials such as username, password, and time-based one-time passwords (TOTP) are synced with the GateKeeper Hub server, and available to you on every computer you log on to using your GateKeeper. Unlike other enterprise password managers, GateKeeper provides faster access with the user in mind.

- ✓ One key to access all your computer and web passwords.
- ✓ Passwords are encrypted and stored securely on GateKeeper Hub.
- ✓ Credentials are available on every computer you log on to.
- ✓ Generate one-time passwords directly through the GateKeeper app.
- ✓ No more SMS or manual authenticating.

INSTANT 2FA WITHOUT ADDITIONAL DEVICES

Secure access to sensitive websites through 2FA by using the GateKeeper's built-in one-time password generator. A password management enterprise solution that actually saves you time. There is no need for Google Authenticator or other apps since the GateKeeper Password Vault generates OTP codes on demand, and automatically fills them in when you visit a website – much faster.

- ✓ Combat phishing emails, scams, and websites with MFA.
- ✓ Automatically fill in OTP codes for web access control.
- ✓ No need for separate applications on the phone for OTP codes.
- ✓ Support for 2-FA websites such as Google, Azure, Okta, Dropbox, and more.

TECHNICAL SPECIFICATIONS

- ✓ Enterprise password manager with onsite database synchronization
- ✓ All passwords available on every computer you sign in to
- ✓ Extensions for Chrome, Firefox, and Opera available now
- ✓ Edge and Safari coming soon
- ✓ Automatic, time-based OTP generation for web 2-FA

PATENTED TECHNOLOGY

GateKeeper uses patented technology for wireless access management. Using real-time authentication (as opposed to traditional one-time), the GateKeeper constantly verifies.

Utility Patent Number: 9,449,165. System and Method for Wireless Proximity-Based Access to a Computing Device.

Employees typically have to remember 15+ web passwords. GateKeeper automates the storage and retrieval of passwords, making them instantly available to you at any workstation. Save hundreds of hours by auto-filling in web credentials when authenticating with GateKeeper.
