- ✓ More time to see more patients due to fewer password problems
- ✓ Permanent reduction of time expended on logging in to clinical software such as HER
- ✓ Computers auto-lock when users leave so users do not have to worry about locking PC
- ✓ Eliminate the need to remember all your usernames and passwords
- ✓ Reduce workflow interruption due to HIPAA and policy requirements
- ✓ See who is logged in and when they last logged out, even on kiosk computers authentication.

### Significant clinical impact – see more patients

Between HIPAA policies and heightened infection control due to COVID-19, logging in to PCs and EHRs is taking more time and effort that could be used to see more patients. GateKeeper reduces time logging in to clinical software has translated into significant recurring savings for institutions. Doctors have reported being able to see multiple additional patients each day due to time saved using GateKeeper for
