

GATEKEEPER TRIDENT APP

Turn your phone into a wireless access key with the Trident app.

Keyless entry - use your smartphone to unlock computers and websites.

You always have your phone with you and with GateKeeper Trident, you can use your phone as an authentication token to access your computer and websites. GateKeeper Trident App eliminates manual logins forever.

- ✓ Most convenient login ever
- ✓ No need to carry a separate key
- ✓ No more forgotten passwords
- ✓ No internet/cellular connectivity required
- ✓ Contactless, proximity-based login

Unlike others, the GateKeeper Trident automatically logs you into websites, leaving no margin for errors. With other authenticator apps, users enter the OTP incorrectly 10% of the time.

Carry your mobile phone with you to get seamless access to all your computers and websites. Secure all your workstations and reduce the risk of internal threats and data breaches.

TURN YOUR PHONE INTO A WIRELESS KEY

Never feel guilty about saving passwords again. With our enterprise solution, all your login credentials are synced across the network and available at any computer you log in to using Trident/Halberd.

- ✓ Use your phone as a backup key
- ✓ Choose your login method preference
- ✓ No batteries to replace
- ✓ Completely secure, no info transmitted
